MEMORANDUM OF UNDERSTANDING
Between
FARM SECURITY ADMINISTRATION AND OFFICE OF LABOR

Regarding Farm Labor Supply Centers

Pursuant to Public Law 45, 78th Congress, War Food Administrator's Memorandum No. 2 (Revised), dated June 21, 1943, authorized the transfer to the Office of Labor of all funds available for carrying out the functions consolidated into the Office of Labor, and such of the personnel and property of the Farm Security Administration as the Deputy Administrator of the War Food Administration determined to be necessary for such functions. Office of Labor, at the time of this authority, without full knowledge of the extent of the Labor Program to be operated under Public Law 45, was not in a position to determine the farm labor supply center facilities and property of Farm Security Administration which were required in its Program. Under these circumstances, on June 24, 1943, a joint telegram signed by the Administrator of the Farm Security Administration and the Deputy Administrator of the War Food Administration was sent to all regions having farm labor supply centers to the effect that all farm labor supply centers and property used in the performance of Office of Labor functions would be made available to Office of Labor on an informal basis pending the final determination by such Deputy Administrator as to the facilities and property required by it at some later date. The telegram provided that such centers and property and all necessary equipment and transportation facilities would remain on Farm Security Administration inventory and would be on loan to Office of Labor.

Pursuant to informal arrangement, Farm Security Administration, by agreement with the Office of Labor, has been leasing properties excess to the needs of Office of Labor and has, in some instances, sold such properties, which constituted economic farm units, to eligible farmers.

Under these circumstances, it is desirable for the Director of Labor to make final determination now, under the authority of War Food Administrator's Memorandum No. 2 (Revised), as to Farm Security Administration farm labor supply center properties required in the operation of the Office of Labor program, and this Memorandum of Understanding between Farm Security Administration and Office of Labor is intended to record and formalize that determination, as well as formalize the return to FSA jurisdiction and control of certain properties no longer needed in the Office of Labor Program.

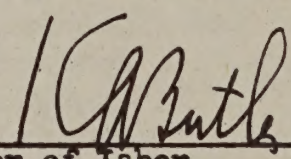

In Exhibit A, attached hereto and made a part hereof, the acreages listed and identified under the heading "Office of Labor" reflect those acreages which were transferred to, and are still retained by, Office of

Labor. Such acreages, together with all improvements, appurtenances and necessary equipment thereon (such properties being herein referred to as "Office of Labor Land"), are needed in the operation of the Office of Labor Program and the management, operation and maintenance thereof shall remain under the Director of Labor. The acreages listed and identified under the heading "FSA" reflect: (1) those acreages not transferred to Office of Labor and (2) those acreages which, although heretofore so transferred, are no longer needed in the Office of Labor Program and, either have been, or are hereby retransferred and returned to Farm Security Administration.

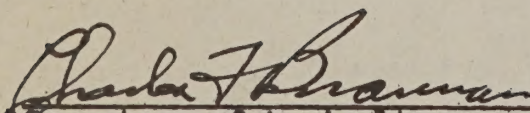

The Office of Labor Land, together with all improvements, appurtenances and necessary equipment thereon, shall remain on Farm Security Administration inventory and shall be on loan to the Office of Labor on the basis provided in War Food Administrator's Memorandum No. 2 (Revised) and the telegrams referred to above. The Director of Labor shall retransfer and return to Farm Security Administration such of the Office of Labor Land, together with all improvements, appurtenances and necessary equipment, or portions thereof, as and when each such property (or portion thereof, as the case may be) is determined by the Director of Labor to be no longer needed in the Office of Labor Program.

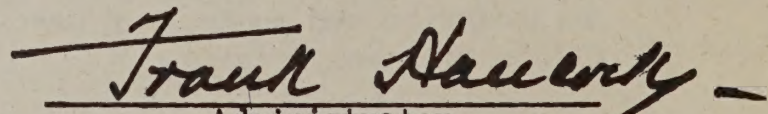

The ultimate obligation for payments in lieu of taxes under "Bankhead" agreements in respect of the properties here involved may be pro-rated or adjusted between Office of Labor and Farm Security Administration on the basis of the date or dates, mutually agreed to, on which a change in the responsibility for the management, operation, and maintenance of the individual properties occurred or occurs.

IN WITNESS WHEREOF, this Memorandum of Understanding has been signed by the Director of Labor and by the Administrator of Farm Security Administration, recommended by them for approval by the Secretary of Agriculture, and approved by the Secretary of Agriculture, being effective as of the date of such approval.

Acting Director of Labor

Approved:

Assistant Secretary of Agriculture

Administrator
Farm Security Administration
